- ◆ baked enamels
- ◆ lacquers
- ◆ varnishes
- ◆ synthetic enamels
- ◆ zinc chromate primers
- ◆ Epoxies
- ◆ and polyurethanes

Surface Preparation

Remove all hardware from the article to be stripped. Use masking tape to cover any remaining hardware - mask off all plastic and rubber surfaces.

Mixing Ratio

This product requires no mixing, use straight out of the container.

Application Method

To avoid contact with skin and eyes, wear chemical resistant gloves and use a fresh air respirator.

Endura Paint Stripper should be stored in the original container or in a metal container with a secure lid. Apply by non-atomizing spray, brush, or pour-on methods. After 15 to 20 minutes, Endura Paint Stripper will penetrate and lift old finishes. Use a metal scraper to remove the old finish. Brush with a stiff bristle-brush to remove paint residues.

Not recommended for use over fiber glass or plastic.

Disposal

Store all waste in a metal container.

Dispose of in accordance with local requirements. Contact your local sanitation department or waste disposal contractor for more information.
